BELEK, ANTALYA

Belek, which has a fascinating nature, is not only the most preferred destination in Antalya, but also the most popular destination brand around the world. With its protected natural life, historical beauties, fresh air of pine and eucalyptus trees and seventeen kilometers of fascinating coastline, Belek is at the top of the list of places to see. The freshwater streams flowing from the slopes of the Taurus Mountains give it distinctive features from other Mediterranean locations. Belek, which hosts all these features together, offers a magnificent atmosphere not only as a tourism center but also as a region that contains all the unique features of the Mediterranean.

GOLF SAHALARI

Belek is the most important golf tourism destination in Turkey. In 2008, Belek was awarded the Best Golf Destination of the Year in Europe by the International Association of Golf Tour Operators (IAGTO) and more than 50 national and international tournaments are organized in Belek throughout the year. Among these, there are the Turkish Airlines World Golf Cup, the most important amateur golf tournament in the world, the Turkish Airlines Challenge, which brings together the most talented young golfers of Europe, and the Turkish Airlines Open, one of the 8 tournaments in the European Tour Rolex Series. Held for the 5th time in 2017, the Turkish Airlines Open hosts Europe's best golfers every year and makes a great contribution to the promotion of our country via live broadcasts in more than 50 countries. There are 16 golf courses in total in Belek and the majority of them are with 18 and 27 holes.

All golf courses in Belek region are available with pre-booking.

THE LAND OF LEGENDS

Known as the Disneyland of Antalya, The Land of Legends Theme Park is a destination that offers unlimited entertainment for guests of all ages with shopping units, a water park and a theme park complex. The Land of Legends Aquapark is available with pre-booking.

EXPO CENTER

In the world-renowned EXPO Center, with innovative technology systems, the use of natural and renewable energy sources, green space density, solar energy, water mill, green bridges, green roofs, and also the preference of products with low carbon footprint, there are scenarios where visitors can have individual experiences and children can gain experience in educational and instructive activities.
