HOTEL'S ARCHITECTURE AND LUXURY INTERIOR DESIGN

The acclaimed architect Sinan Kafadar restructured the building according to his signature fusion of timeless design with up-to-date green technology. The Gezi Hotel Bosphorus cultivates beauty inside and out.

The high-quality wood and leather used in furnishings throughout to offer a warm, cozy atmosphere that is amplified by a contemporary design ethos that fuses the rich color-blocking of Piet Mondrian with high tech flourishes. Design of the rooms and suites are inspired by an element of one of Mondrian's paintings, yet sumptuous materials soften the Strong, linear forms typically associated with the Dutch painter.

The hotel was Re-build according to ecologically friendly principles, particularly in regards to energy and water conservation resulting in Europe's acclaimed Greening Hotel certification.
